Main points discussed:

- Working workflow :
 - Members will be granted access to the organization repository and it will be forked for each one.
 - Each member will clone it locally, and push their work.
 - Submitted code will be reviewed and evaluated.
- Project Setup :
 - All setup instructions are available in installation.md
 - It's recommended to use Anaconda for environment management
 - Python version : 3.11
- Project Structure Description :
 - minitorch folder : working space
 - project folder : simulation of usage of the minitorch framework
 - test folder : contains test files
- Introducing pytest for writing and running test files
